Member FDIC

After attending this event, participants will know more about:

- What your firewall and antivirus software can't protect you against.
- How to implement internal controls to protect your business.
- How to develop online access procedures and security measures for your business.
- The current state of business fraud risks that could impact your business.
- Account takeovers and fraud scenarios that could happen to your business.
- Resources you can use to help protect your business.
- What to do if you are a victim of an information security breach.

About the Speaker

Erin Fonte is an attorney with Cox Smith Matthews Incorporated in Austin, Texas. Her practice includes banking and financial services, payments systems laws, e-commerce, technology/ Internet products, privacy and data security/protection laws (including data security breach laws) and general corporate matters. Erin has authored articles relating to privacy and data security issues, FACTA ID Theft Red Flag requirements and payments systems laws.
